Board President, WCBDD Date

The following definitions will apply:

Technology Solution – any product, device, equipment, or service used to maintain, increase, or improve the functional capabilities of an individual with developmental disabilities and that is deployed in accordance with applicable federal, state, and local rules and regulation (ORC 5123-2-01).

It is the philosophy of the Wood County Board of Developmental Disabilities (Board) that individuals with developmental disabilities should have access to innovative technology solutions. Furthermore, the Board fully supports the Governor's Executive Order 2018-06K for Technology First. Therefore, the Superintendent will be responsible for the development and implementation of procedures that ensure technology solutions are explored and documented throughout the person-centered planning process and are used to the greatest extent possible to support the outcomes identified in individual service plans.
