The Thermal Scanners are utilized to ensure that everyone who enters Board Owned facilities is maintaining a proper body temperature during a health pandemic. The implementation of the scanners is specifically to allow the Board to minimize the potential risk of exposure to COVID-19 while at the workplace. These scanners are utilized to eliminate the use of a community thermometer and community pen for the contact tracing requirements. The information is stored in a database for one cycle (30 rolling days) until considered obsolete, then it is destroyed.
